

## Hanging Platform

Cradle Systems being used for Finishing, Plastering, Painting, Glass Fixing and Aluminum Fixing

Glass  
Glazing  
&  
Fixing

A large number of commercial high-rise buildings in India now have external glass curtain walls. Such buildings require constant maintenance, This is highly dangerous work which should be carried out by cleaners using Suspended Cradle System with a Cradle suspended from the roof which replaces conventional scaffoldings. The system can be used for external brickwork, plastering, painting, finishing etc.

Lokpal industries offers such sophisticated systems consisting of an electrically operated Hoisting machine incorporating a 'α' cable guidance system and Anti Inclination safety locks as well as Speed Limit safety locks. These are available upto 800kg capacity.

These Cradle systems are easy to install on the roof of the building. The height of the suspension Jib, as well as the projecting length (front beam) is adjustable so the system can easily adapt to different Facades and Fascia's as well as roof structures. Special systems can be designed to suit the users non standard requirements.

# Suspended Cradle System

ZLP 250

**Specifications:**

Model No	ZLP 250	ZLP 800 / LTD 800
Capacity Kg	250	800
Type for safety lock	Speed Limit Type	Anti Inclination Type
Power	1.1Kw, 3 Phase	1.8Kw, 3 Phase
Platform Material	Aluminum	Aluminum
Suspension Mechanism	Steel	Steel
