Scaffold Supports the Hoist !!!

hulk

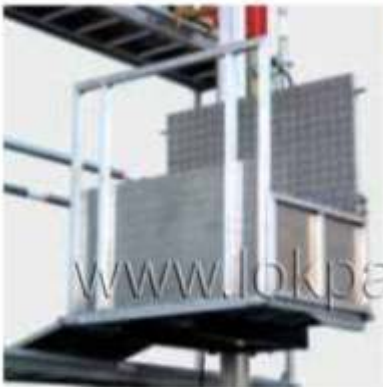

ISO 9001:2000 CERTIFIED

no building support essential

1. Light weight motor and gear box assembly can be easily lifted and installed, by 2 people.
2. Cabin is attached to the main frame by easy to fit 3 bolts.
3. Complete assembly can be done easily by 2 people.
4. Self erecting design of the mast section makes it very easy to install. Each additional mast section can be carried in the cabin/ cage itself and erected by the operator whenever the lifting height of the cabin is to be increased.
5. Since the equipment fits within the existing scaffold itself no additional space is required to accommodate the lift.
6. The lift can be attached to the scaffold itself so no extra wall ties are required.
7. The safest elevator system in the market incorporating, centrifugal safety device, emergency brakes, top on bottom limit switches, gate switches etc.
